

AT&T **Virtual Field Trips**

FREE for Buffalo or
Niagara Falls public or
charter schools and Western
New York Title 1 schools

The AT&T Virtual Field Trips program provides tens of thousands of students with the opportunity to experience free virtual field trips throughout Buffalo and Niagara Falls in a memorable, fun and safe way.

The program provides both prerecorded videos and live virtual leader-led tours, and is designed to provide a wide array of offerings tailored for students of different ages between the 1st through 12th grades. Some of the program partners offer downloadable materials for teachers and interactive kits for the students to use.

This unique program is entirely free for all students and classes that attend Buffalo or Niagara Falls public or charter schools and Western New York Title 1 schools, thanks to the generosity of AT&T and the program's partnering cultural and educational institutions.

Albright Knox

Great art is transformational. The Albright-Knox invites teachers and students from grades K-12 to join us for virtual experiences designed to support the development of the critical and creative thinkers of tomorrow. Opportunities include live virtual guided tours, plus pre-recorded videos that will serve as a teaching resource to focus on critical thinking, collaboration, communication, and creativity. Students will discover works of art from the Albright-Knox's collection and exhibitions through a range of learning strategies, including open-ended and guided questions, conversation, and activities.

Buffalo Museum of Science

The Buffalo Museum of Science's experienced facilitators are ready to bring the wonder and excitement of the museum to virtual classrooms! The museum's experienced facilitators will bring a unique educational experience and scientific expertise to students and educators. Whether participants are looking for an eye-popping science demonstration or a Behind-the-Scenes virtual tour, students and teachers can customize programming to suit specific needs and grade level. If school district guidance allows, kits can also be assembled and delivered to schools to give your students immersive, hands-on experiences.

Niagara Falls Underground Railroad Heritage Center

The authentic stories shared at the Niagara Falls Underground Railroad Heritage Center highlight the extraordinary results that are achieved when ordinary people stand against oppression. On a live virtual field trip, museum educators will connect with classrooms remotely in real time. During a facilitated, interactive program, students will learn the history of the Underground Railroad in Niagara Falls while engaging in dialogue that will help them recognize the modern injustices that stem from slavery and think critically about what steps they can take to create a more equitable, just, and free society. This program is best suited for grades 4 through 12".

The Buffalo History Museum

The history of Western New York is filled with stories of diverse people striving to create a place that they can call home. Stories brewing with ingenuity and hope, but fraught with struggle and conflict. Experience a virtual tour that brings the past to life in a personal way through intimate narratives of everyday people and key historical figures. From opportunities to engage with real artifacts & primary sources to connecting with subject matter experts, access our unique resources. These virtual tours are ideal for 4th, 5th, and 6th graders.

Explore & More

The Ralph C. Wilson, Jr. Children's Museum

Children of all ages learn through exploration and grow through creativity. In this spirit, we invite young learners-the innovators of tomorrow, to "Explore, and More!" Explore & More has created seven (7) interactive videos – that can be used all together or individually by teachers. Each video includes a tour of one of our Educational Play Zones; a related activity and/or experiment that can easily be replicated by parents at home or teachers in school; and conclude by highlighting a STEM career. These tours are ideal for 3rd – 5th graders.
